Release Notes

What's new in Shield3D

Shield3D v2.7
November 2026

v2.7 (November 2026)

- **Customer portal in English**: sign-in, your subscription, plan and workstation changes, cancellation and upgrading from the trial are now available in English. Customers who signed up on the English or Chinese website see the portal in English and can switch to Japanese at the top right.
- **Emails in English**: password resets, trial-ending reminders, upgrade confirmations and failed-payment notices are sent in English to customers who signed up on the English or Chinese website.
- **Upgrading in US dollars**: customers who started a free trial on the English or Chinese website can now upgrade by card in US dollars.
- **Subscription terms on the order page**: the term, automatic renewal, cancellation and refund conditions are now shown before you order.
- **Product website**: new Legal notice, Privacy policy and Contact pages (English, Japanese and Chinese).
- **Card payments only**: we no longer accept invoice payment.
- **For businesses**: the order page asks you to confirm that you are applying for business use.
- **Plan and workstation changes**: changes that increase the fee take effect immediately, and the prorated difference for the rest of the current term is charged. Changes that keep the fee the same or lower it take effect from the next term (shown as "from the next term" on your account page).
- **Renewal reminder for annual plans**: we email you 30 days before renewal with the renewal date, the renewal amount and how to cancel.
- **Free trial sign-up**: your license key is issued after you confirm your email address.
- **US dollar customers**: additional workstations ($10/month each) can now be ordered, and invoices/receipts are issued in English.
- **Promotions**: limited-time discounts and "first months off" offers are now supported. During a promotion, the pricing page shows the discounted price and invoices/receipts include a discount line.
- **False positive fixed**: comment lines that Maya never runs (such as `//Name: ….ma`) were flagged for review when the file name contained words like "cmd".
- The manuals (PDF) are updated for v2.7.

v2.6 (November 2026)

- **Product website** (English, Japanese and Chinese): start a free trial or buy online. Card payments show your license key and download links right away.
- **US dollar pricing** on the English and Chinese websites (Standard $39, Pro $149 per month; annual billing charges 10 months).
- **Installer downloads**: time-limited download links for customers and trial users, also available from the customer portal.
- The manuals (PDF) can be read and downloaded on the product website.

v2.5 (November 2026)

- **Renamed from MayaGuard to Shield3D**: the app, reports, folders, settings file (`shield3d_settings.json`), license keys (`S3D-`) and app name (`Shield3D.exe` / `Shield3D.app`).
- **Report addressee**: enter a “Client name (report addressee)” when creating an inspection report.
- **Free trial to paid plan**: the app shows “Free trial (N days left)” and “Upgrade to a paid plan”. Your license key stays the same.
- **Tamper protection**: bundled files are checked for integrity at startup.
- **New icon** for the app and installers.
- **Installers**: install with `Shield3D-Setup.exe` on Windows and a `.pkg` on Mac.
- **Upgrading from MayaGuard v2.4**: copy `mayaguard_settings.json` to `shield3d_settings.json`. Data now lives in `%APPDATA%\Shield3D` (Mac: `~/Library/Application Support/Shield3D`).

v2.4

- Japanese and English display (app, results, reports and command help).

v2.0 – v2.3

- Multi-engine scanning (Shield3D's own analysis + YARA + ClamAV + Microsoft Defender + VirusTotal hash lookup).
- .mb structure analysis and cleaning by neutralizing, without Maya.
- Automatic deobfuscation (base64, zlib, XOR, string concatenation and more) with rescanning of the decoded content.
- Mac version, graphical interface, definition distribution, plans, licensing and payments.
